Before we start adding css properties of each section. We must import the fonts that we will use and set universal and element properties of our coffee bean.

1. Import font - go to this link <https://fonts.google.com/> and search for font family “Oswald” and add font weights 400,500 and 600. Next is “Raleway” and the font weights 400, 500 and 700.
